

Group Task

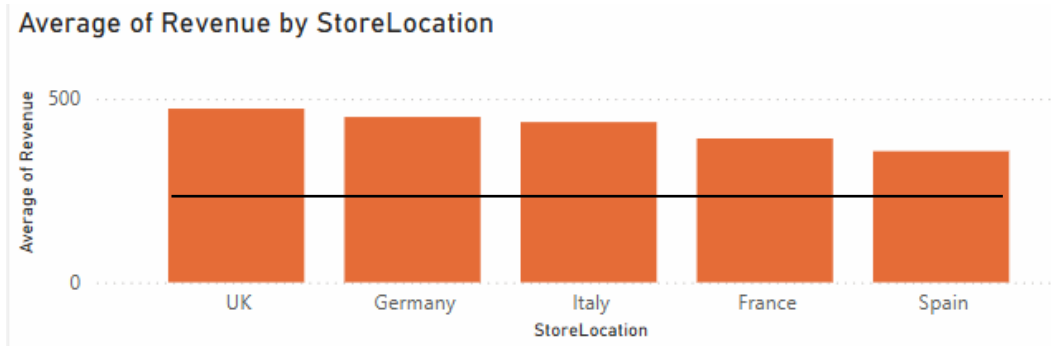

Elevation DA course final project

Role and mission

As a team, we've been asked to perform a deep “drill-down” on our company data to uncover inefficiencies and deliver actionable insights for Elevation Bikes.

The role we pick → Operations Manager - Reviews inventory and logistical operations to **maximize efficiency**.

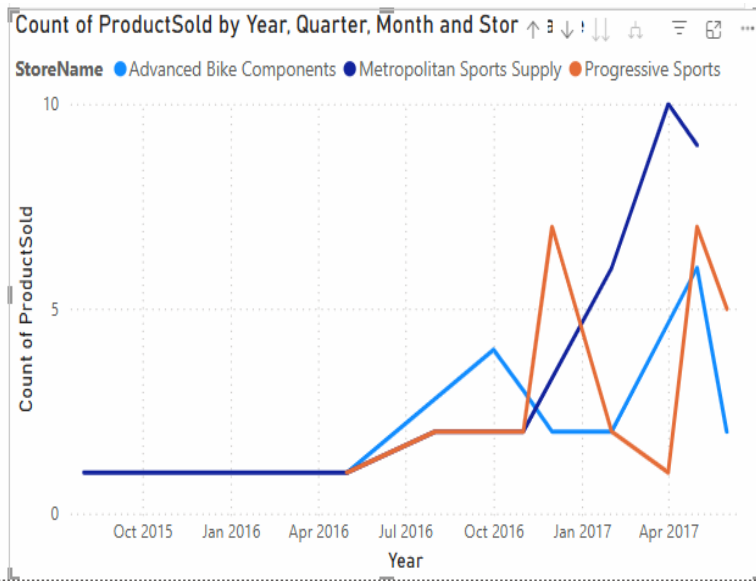

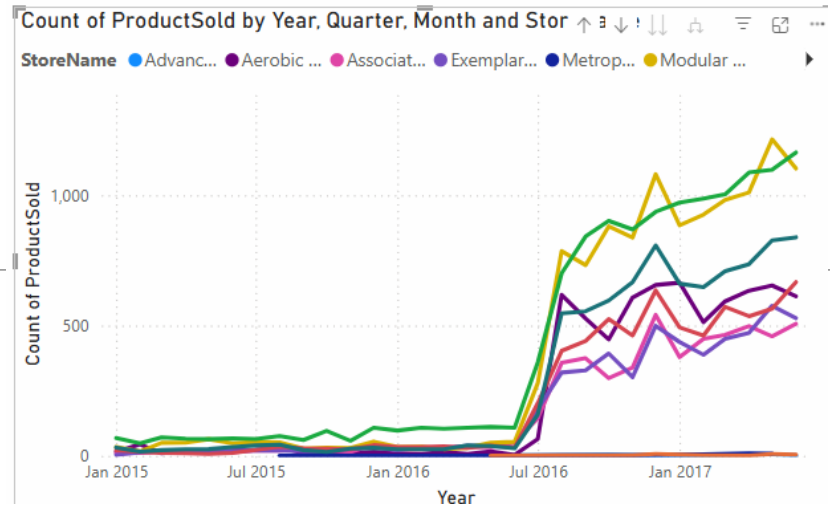

key consideration for this role → Maximize profitability by ensuring each sales region achieves an average revenue of \$350K and minimizing expenses.

Team Elevation Analytics

Count of ProductSold by StoreLocation

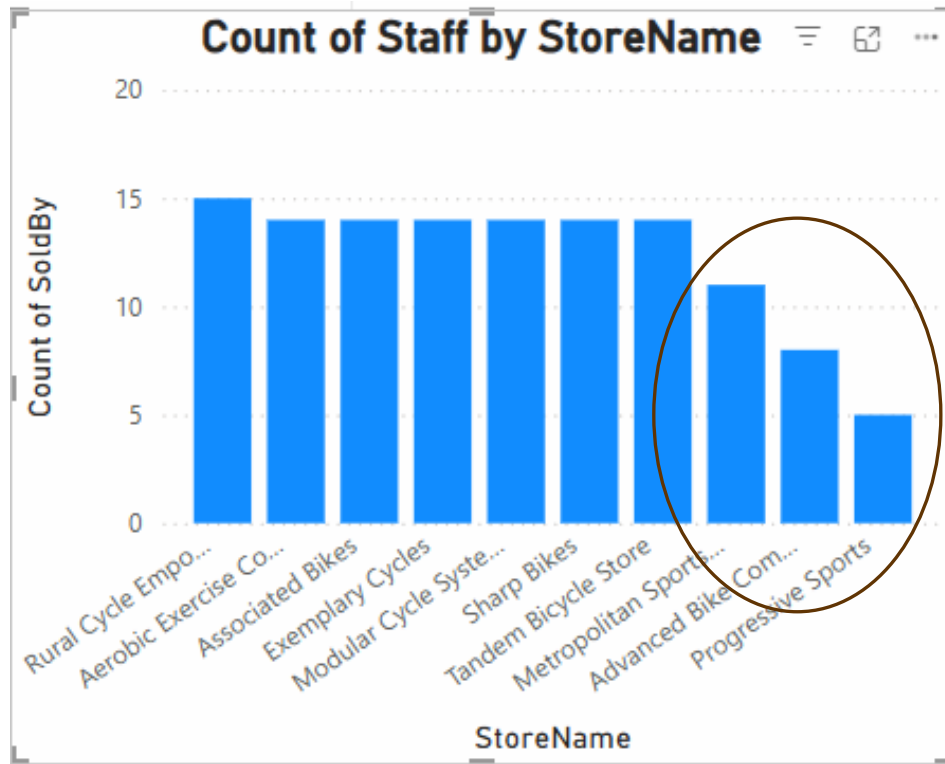

- Products sale per Region
- Focus on Stores sales performance.

Staff impact on sales

Team Elevation Analytics

Insight: **3 stores show consistent poor sales over the past quarters.**

Team Elevation Analytics

Recommendation:

- Close 3 least profitable stores.
- Reallocate resources to high-performing locations
- Cost savings from rent, staffing, and logistics.
- Boost in overall efficiency.
- Projected profit margin improvement.
